

Rebecca Pennington
123 Blantire Ave
Scarborough, ON M1N1N8

Profile

Motivated Software Engineering Technician student at Centennial College with developing skills in programming, web development, database development, and software design. Experienced with hands-on academic projects involving Java, SQL, React, software requirements, and UML design. Enjoys creating functional and visually appealing software while continuing to build technical and problem-solving skills. Interested in growing into a career in software development and technology.

Technical Skills

- Programming: Java, JavaScript, C#
- Web Development: HTML, CSS, React, Vite
- Databases: SQL, Oracle Database, MongoDB
- Software Development: Object-Oriented Programming, Software Requirements, UML, Software Design
- Development Tools: Git, GitHub, Eclipse, Visual Studio Code, Oracle SQL Developer
- Other: Responsive Web Design, Version Control, Problem Solving

Education

Centennial College — Toronto, Ontario
Software Engineering Technician
2024 – Present

Developing practical skills in programming, web development, databases, software design, and software requirements through hands-on coursework and projects.

Academic Projects

React Portfolio Website

- Developed a multi-page personal portfolio using React and React Router.
- Created pages for About Me, Projects, Education, Services, and Contact.
- Applied HTML, CSS, JavaScript, reusable React components, and responsive layout techniques.
- Used Git and GitHub for version control and project development.

Java Programming Projects

- Developed Java programs using object-oriented programming concepts.
- Applied classes, objects, fields, constructors, methods, and user input.
- Used Eclipse to develop and test Java applications.

Database Design Project

- Designed relational database structures using Oracle SQL.
- Created SQL statements for working with database tables and information.
- Applied database design and normalization concepts.

Software Requirements & UML Project

- Analyzed software requirements for an Auto Insurance Claims Management System.
- Created UML models including use case, class, and other system diagrams.
- Collaborated with team members to document system requirements and design.

Relevant Coursework

- Object-Oriented Programming
- Web Development
- Database Design and SQL
- Software Requirements Engineering
- Software Systems Design
- React and JavaScript Development

Past Experiences

Walmart — Washington State, United States

Health & Beauty Associate → Overnight Stocker → Department Manager

2010 – 2014

- Progressed through multiple roles, taking on increasing levels of responsibility.
- Assisted customers and provided knowledgeable service within the Health & Beauty department.
- Stocked, organized, and maintained merchandise during overnight operations.
- Managed department operations, including organization, inventory, and daily tasks.
- Worked effectively with coworkers and customers in a fast-paced retail environment.
- Developed communication, organization, problem-solving, and leadership skills.

Great Wolf Lodge — Rochester, Washington State, United States

Pizza Hut Express Worker

2008 – 2010

- Prepared pizzas and ingredients while following food preparation and safety procedures.
- Operated the cash register and handled customer transactions.
- Maintained a clean and organized food service area.
- Washed dishes and completed closing cleaning duties.
- Provided customer service in a fast-paced hospitality environment.
